REVIEWS OF DANNY ARCHER'S LECTURE

- It had to be one of the best lectures we have had in the last 5 years. Everything you did was not only carefully explained but you presented it all with humor and explicit insight into the workings of each effect. They were all solid, audience tested, routined and ready to be inserted immediately into ones act. Nothing was a "throw away" or "puff" piece." (Sam Holveck Delaware)
- ".... I enjoyed your lecture very much Your material was some of the best and most useable I enjoyed you more!" (Chuck Fayne)
- I was at your lecture at the Magic Castle. You gave a great lecture! Your Archer Shuffle has got to be the best, most practical and useful card move that has been invented in the last 10 years! And your lecture notes, are nicely written and have LOTS of "worker" items in them. They are one of my better investments." (Joe Marotta)
